

Steps for New Service

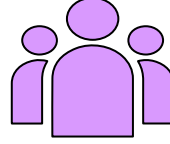

Request new service by completing a new membership application.

New application will need to include hydraulic study fee.

Onsite meeting scheduled to review and determine the location of the new meter.

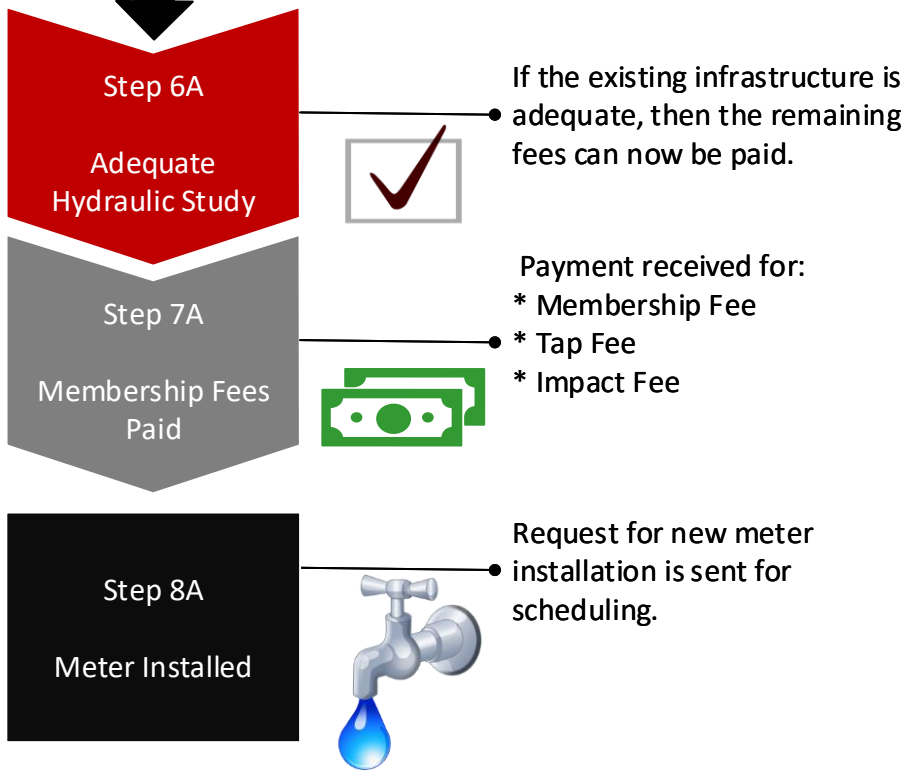

New meter location and other information provided, by Rural Bardwell Water, to the engineer along with elevation changes and other geographic details.

Engineer performs the analysis taking into account existing infrastructure versus the new service request.

Engineer forwards the results of the hydraulic study to Rural Bardwell Water.

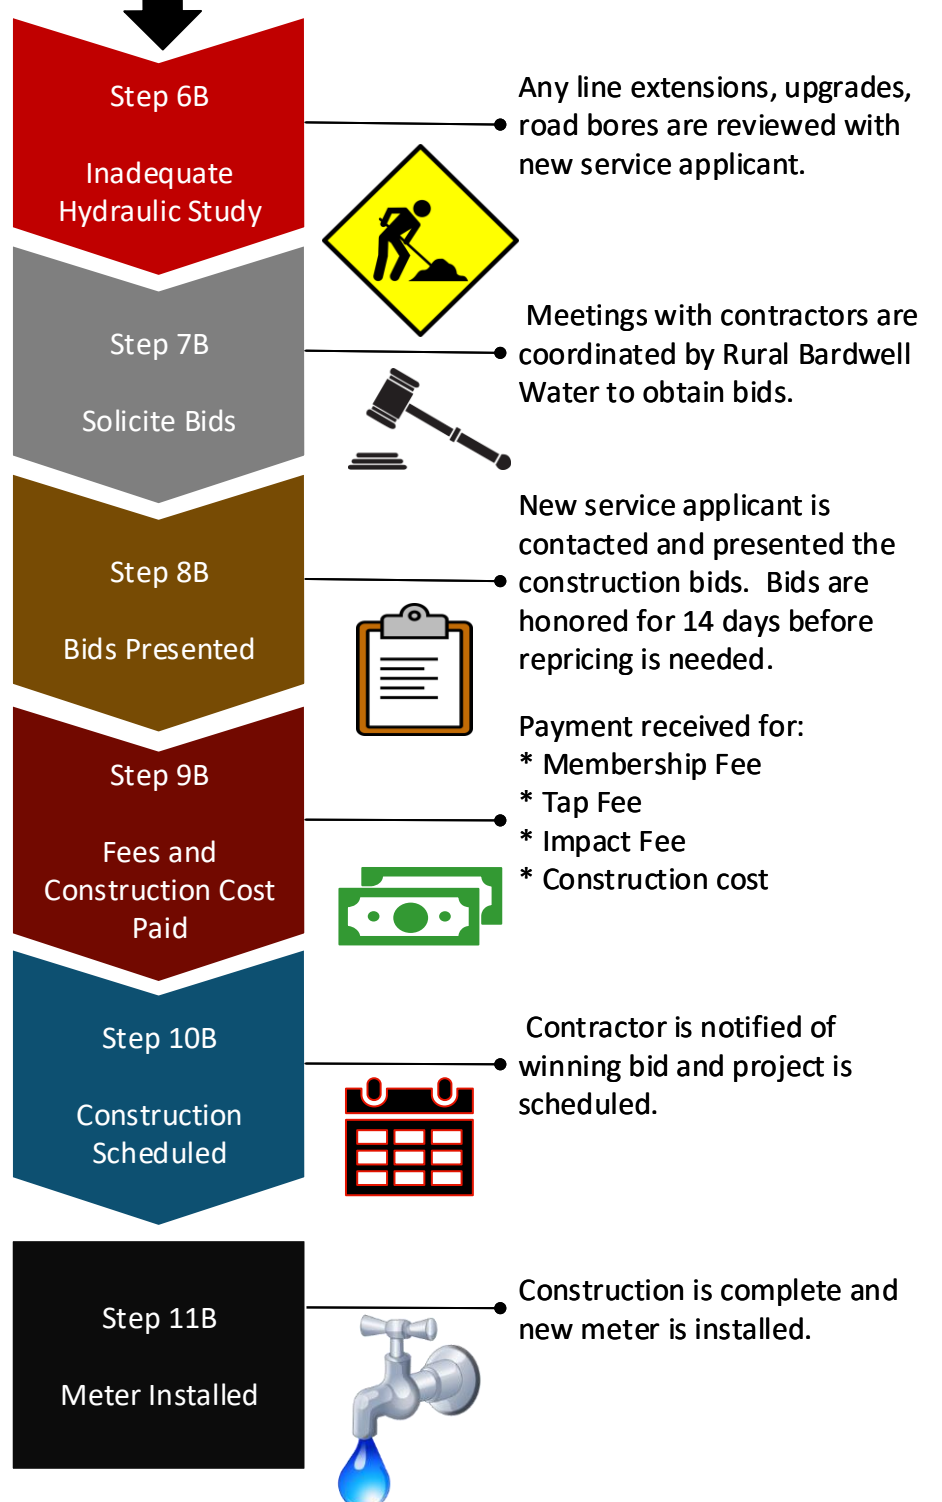

If the existing infrastructure is adequate, then the remaining fees can now be paid.

Payment received for:
* Membership Fee
* Tap Fee
* Impact Fee

Request for new meter installation is sent for scheduling.

Any line extensions, upgrades, road bores are reviewed with new service applicant.

Meetings with contractors are coordinated by Rural Bardwell Water to obtain bids.

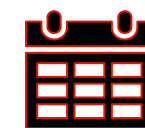

New service applicant is contacted and presented the construction bids. Bids are honored for 14 days before repricing is needed.

Payment received for:
* Membership Fee
* Tap Fee
* Impact Fee
* Construction cost

Contractor is notified of winning bid and project is scheduled.

Construction is complete and new meter is installed.
